ASSOCIATE PRODUCT MANAGER | AI + FINTECH PRODUCTS | MBA FINANCE & MARKETING

MBA Finance and Marketing graduate with hands-on product management experience across AI, fintech, trading workflows, payments, onboarding, and user-facing web products. Currently owning product planning and execution for Finverse through a Bermer Software Limited client/product engagement, combining product thinking with technical execution across AI chat, market tools, checkout, admin workflows, and real-time trading features. Strong fit for APM/Product Intern/Product Analyst roles requiring user problem definition, feature prioritization, product flows, stakeholder communication, metrics thinking, and close collaboration with engineering.

PRODUCT SKILLS

Product Management: Product roadmapping, feature prioritization, user stories, acceptance criteria, requirement gathering, stakeholder communication, sprint planning basics, agile/scrum fundamentals, business presentation, market research, user journeys

AI + Fintech Product: AI assistant workflows, Azure OpenAI, multilingual chat UX, prompt design, finance workflows, market data, stock screeners, watchlists, strategy builder, backtesting, paper trading, trading journal, portfolio/user insight flows

Analytics + Business: Product metrics, funnel thinking, activation/retention/conversion basics, Power BI, MS Excel, data visualization, financial analysis, operations management, recruitment metrics

Design + Collaboration: Figma, UI/UX design, wireframing, user flows, Canva, stakeholder-ready product pitches, documentation, cross-functional communication

Technical Literacy: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, Go, MySQL, REST APIs, WebSocket APIs, Razorpay, Docker, Azure Blob Storage, Vercel, Firebase, Supabase, Git, GitHub

EXPERIENCE

Product Manager | Finverse Client Engagement via Bermer Software Limited | Feb 2026 - Present

- Own product planning and execution for Finverse, an AI-powered stock market super app covering Zeno AI, stock screeners, strategy builder, backtesting, paper trading, courses, admin panel, subscription/course checkout, and market-data workflows.
- Translate complex finance and trading problems into product flows, user journeys, feature plans, and implementation-ready requirements for AI, payments, learning, market data, and trading simulation modules.
- Shaped Zeno AI workflows for multilingual finance queries, chat history, guest limits, IPO/GMP/market-data enrichment, rate limiting, and tool-grounded AI responses to improve usefulness and trust.
- Prioritized and shipped fintech workflows including screeners, watchlists, paper trading journal, PnL handling, candles, quotes, and strategy backtest journeys for retail trading use cases.
- Implemented and validated Razorpay course/subscription checkout flows with order validation, signature verification, webhook hardening, coupons, feature flags, and content access controls.
- Authored 100+ frontend/backend commits across Next.js and Go repositories, enabling strong collaboration with engineering and faster product iteration.
- Improved production readiness through admin tooling, Docker, Azure Blob Storage uploads, CORS origin lockdown, health checks, environment configuration, and deployment wiring.

Product Intern | Bermer Software Limited / Niyantha Transits Private Limited | Jan 2026 - Present

- Supported product and business presentation work for Niyantha, a hardware/IoT product initiative under Bermer Software Limited.
- Contributed to product positioning, stakeholder-facing presentations, and business communication before transitioning into the Finverse client engagement.
- Helped convert early product ideas into clearer presentation narratives, roadmap direction, and stakeholder-ready material.

Product Manager (Technical) | Kiddofin | Bengaluru | Dec 2025 - Jan 2026

- Designed automated email onboarding flows to improve customer activation and first-time user experience.
- Led website design and development, translating product goals into user-facing web experiences.
- Created product roadmaps, feature plans, and stakeholder-ready product pitches for early product direction.

Human Resource Management Intern | Peunier | Remote, India | Dec 2024 - Jan 2025

- Developed job descriptions and posted openings across hiring platforms, improving candidate visibility by 30%.
- Screened and interviewed candidates, helping hire 13+ qualified individuals within one month.
- Streamlined recruitment workflows using an ATS, reducing hiring time by 25%.
- Prepared recruitment metric reports to support future hiring strategy and staffing decisions.

PRODUCT PROJECTS

SmartSlot | Mobile-first Dental Appointment PWA | Oct 2025

- Built a mobile-first appointment product for dental students and interns to create daily slots, share booking links through WhatsApp, manage leave days, and track case progress.
- Designed around a low-friction patient journey without requiring patient login, using React, Tailwind CSS, Supabase, and Vercel.

RoomSpace | Roommate Key Tracker | Aug 2025 - Present

- Built a mobile/web coordination tool to help roommates track who holds the room key with accountability, real-time updates, and offline synchronization.
- Focused the product around a simple shared source of truth using React, Tailwind CSS, Node.js, and Firebase.

Hybrid 2.0 | Sustainable Automobile Concept | Feb 2025 - Present

- Researched and presented a renewable-energy automobile mechanism focused on reducing dependence on fossil fuels and supporting sustainable development.
- Used SciSpace, Microsoft Word, PowerPoint, Gemini, ChatGPT, and Perplexity for research, analysis, documentation, and concept development.
