PRODUCT MANAGER | FULL-STACK PRODUCT ENGINEER | FINTECH AND AI PRODUCTS

SUMMARY

MBA Finance and Marketing candidate with hands-on product management and full-stack product engineering experience across FinTech, AI chat systems, trading tools, payments, admin dashboards, and hardware/IoT product presentation work. Currently working on Finverse through Bermer Software Limited client/product engagement, combining product ownership with technical execution across Next.js/React frontend and Go/MySQL backend systems.

Strong blend of product roadmapping, business presentation, UI/UX, finance domain knowledge, data analytics, and implementation using modern web, cloud, payment, and AI tools.

SKILLS

Product Management: Product roadmapping, feature planning, requirement gathering, stakeholder communication, business presentation, user flows, market research, agile, scrum, strategic planning

Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, Radix UI, TanStack Query, Axios, Recharts, lightweight-charts, Framer Motion, responsive design

Backend: Go, Echo, GORM, MySQL, Node.js, REST APIs, WebSocket APIs, authentication, OTP/AFA flows, RBAC, file uploads, API integration

AI and FinTech: Azure OpenAI, AI chatbots, prompt engineering, multilingual chat UX, market data, stock screeners, watchlists, paper trading, trading journal, strategy builder, backtesting

Payments and Cloud: Razorpay Checkout, payment verification, webhooks, subscriptions, feature flags, Docker, Azure Blob Storage, Vercel, environment configuration

Analytics and Design: Power BI, MS Excel, data visualization, Figma, UI/UX design, Canva, financial analysis, operations management

Tools: Git, GitHub, Firebase, Supabase, Prisma, n8n, MS Word, PowerPoint, Claude, ChatGPT, Gemini, Perplexity

EXPERIENCE

Product Manager | Finverse Client Engagement via Bermer Software Limited | Feb 2026 - Present

- Sourced to Finverse after initial product internship and business presentation work with Bermer Software Limited/Niyantha, moving from product exposure into active product ownership.
- Own product planning and execution for Finverse, an AI-powered stock market super app covering Zeno AI, screeners, strategy builder, backtesting, paper trading, courses, admin panel, and checkout flows.
- Authored 100+ frontend/backend commits across Next.js and Go repositories, working with React, TypeScript, Go, MySQL, WebSocket APIs, and REST endpoints.
- Integrated Azure OpenAI for AI chat, multilingual prompts, chat history, guest quota limits, server-side IPO/GMP/market-data enrichment, and rate limiting.
- Implemented Razorpay course and subscription checkout flows with order validation, signature verification, webhook hardening, feature flags, coupons, and content access controls.
- Built real-time trading and market-data features including quotes, candles, screeners, watchlists, paper trading journal, PnL handling, and strategy backtest workflows.
- Improved production readiness with Docker, Azure Blob Storage uploads, CORS origin lockdown, health checks, environment configuration, and deployment wiring.

Product Intern | Bermer Software Limited / Niyantha Transits Private Limited | Jan 2026 – Present

- Supported product and business presentation work for Niyantha, a hardware/IoT product initiative under Bermer Software Limited.
- Contributed to product positioning, business communication, and stakeholder-facing presentation preparation before transitioning to the Finverse client engagement.

Product Manager (Technical) | Kiddofin | Bengaluru | Dec 2025 - Jan 2026

- Designed and implemented automated email onboarding flows to improve customer activation and first-time user experience.
- Led website design and development work, translating product goals into user-facing web experiences.

- Created product roadmaps, feature plans, and stakeholder-ready product pitches.

Human Resource Management Intern | Peunier | Remote, India | Dec 2024 - Jan 2025

- Developed job descriptions and posted openings across hiring platforms, improving candidate visibility by 30%.
- Screened and interviewed candidates, helping hire 13+ qualified individuals within one month.
- Streamlined recruitment workflows using an ATS, reducing hiring time by 25%.
- Prepared recruitment metric reports to support future hiring strategy and staffing decisions.

PROJECTS

SmartSlot | Mobile-first Dental Appointment PWA | Oct 2025

- Built a mobile-first Progressive Web App for dental students and interns to create daily slots, share booking links through WhatsApp, manage leave days, and track case progress.
- Used React, Tailwind CSS, Supabase, and Vercel to deliver real-time scheduling and clinic workflow automation without requiring patient login.

RoomSpace | Roommate Key Tracker | Aug 2025 - Present

- Built a mobile/web application to help roommates track who holds the room key with accountability, real-time updates, and offline synchronization.
- Used React, Tailwind CSS, Node.js, and Firebase to support shared-living coordination workflows.

Hybrid 2.0 | Sustainable Automobile Concept | Feb 2025 - Present

- Researched and presented a renewable-energy automobile mechanism focused on reducing dependence on fossil fuels and supporting sustainable development.
- Used SciSpace, Microsoft Word, PowerPoint, Gemini, ChatGPT, and Perplexity for research, analysis, documentation, and concept development.

EDUCATION

Krupanidhi College of Management | MBA in Finance and Marketing | Oct 2024 - Present | CGPA: 8.38/10

University of Madras (The New College) | Bachelor of Economics | Gold Medalist | Oct 2021 - Apr 2024 | CGPA: 7.16/10

ACHIEVEMENTS

- Gold Medalist in Bachelor of Economics, University of Madras (The New College).
- Won first prize for presenting the brand story of Apple among MBA batch 2024-2026 students.
- Won first prize for presenting Hybrid 2.0.
- Led a team to the finale of the SDG Championship 2022.
